

## ANNUAL PUBLICATION RELATED TO BEST EXECUTION

In accordance with Article 27 of Directive 2014/65/EU, DPAM must provide data where clients can reasonably expect that the selected entity will enable them to obtain results that are at least as good as the results that they reasonably could expect from using alternative entities for execution.

### ANALYSIS OF EXECUTION FACTS

#### Relative importance of execution factors

- As described in its execution policy, Degroof Petercam Asset Management (hereafter DPAM) determines the criteria it deems most appropriate to consider and prioritize in the execution of any transaction. This encompasses:
  - the price,
  - all implicit or explicit costs,
  - the speed and likelihood of execution and settlement,
  - the size and nature of the order and
  - any other parameters that may impact the quality or total cost of execution.
- DPAM interprets the above criteria giving full consideration to:
  - characteristics and MiFID classification of the client;
  - characteristics of the order;
  - characteristics of financial instruments that are the subject of that order; and
  - characteristics of the execution venues to which that order can be directed.

#### Potential conflicts of interest in selection of venues

DPAM has transferred the orders for execution to a single broker, namely Bank Degroof Petercam SA. In accordance with its Best Execution Policy, DPAM has selected the Bank Degroof Petercam as single broker for this asset class based on the assessment of the services provided by the Bank Degroof Petercam and the quality of execution obtained by the Bank Degroof Petercam.

In accordance with its obligations, the Bank Degroof Petercam discloses on an annual basis, for each class of financial instruments, the top five investment firms in terms of trading volumes where it transmitted or placed client orders for execution in the preceding year.

The choice of a single broker is further based on the following elements:

- The review of the Order Execution Policy of the Bank Degroof Petercam to ensure that it is in line with the DPAM's best execution strategy, and on the data published by the Bank Degroof Petercam in accordance with RTS 28
- A continuous control of the best execution. DPAM tests, on monthly basis, execution performed by Bank Degroof Petercam SA. The process is based on a stratified sampling method.
- For both equity and fixed income, a quarterly best execution meeting is organized between DPAM and Bank Degroof Petercam SA.

- The review on an annual basis by the DPAM's Management Board that the best execution criteria provided by Bank Degroof Petercam policy are respected for DPAM's customers and the selection of a single entity for execution allows DPAM to obtain the best possible result for their clients.

#### **Agreements with venues**

DPAM has no agreement with brokers regarding payments made or received, discounts or non-monetary benefits.

#### **Rationale underlying changes in selected venues and brokers**

On an annual basis, the DPAM's Management Board reviews that the Best Execution criteria provided by DPAM's policy are respected for DPAM's customers and the selection of a single entity for execution allows DPAM to obtain the best possible result for their clients.

#### **Differentiation in execution quality between client categories**

For retail clients, in accordance with regulatory requirements, the best possible outcome depends on the total consideration, taking into account both the price of the financial instrument and the overall cost of executing the transaction - including any fees paid to third parties involved in the execution of the order.

For professional clients, in accordance with regulatory requirements, the best possible outcome depends on the relative evaluation of the aforementioned criteria depending on the market circumstances.

#### **Details of application of total consideration in providing best execution to retail clients**

No other criteria were given precedence over total consideration of costs and price for retail clients, in line with the DPAM's policy. No exception was recorded in 2022.

#### **Data tools and analytics**

The amount and quality of data have significantly improved in a MiFID II world. The best execution controls performed by DPAM now rely on specific analytical tools like TCA ('trade cost analysis') and 'Best Execution'. These tools allow DPAM to gather statistics and review the execution performance.

#### **Consolidated tape provider**

During the year 2022, DPAM did not use any data coming from a consolidated tape provider.
